EXAMINER

VARNER, STEVE M

ART UNIT

PAPER NUMBER

3635

DATE MAILED: 01/30/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	10/006,635	VACEK, SAM S.
	<b>Examiner</b> Steve M Varner	<b>Art Unit</b> 3635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 08 November 2001.

2a) This action is FINAL.                  2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

4) Claim(s) 1-25 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) Claim(s) \_\_\_\_\_ is/are allowed.

6) Claim(s) 1,2, 4-25 is/are rejected.

7) Claim(s) 3 is/are objected to.

8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) The proposed drawing correction filed on \_\_\_\_\_ is: a) approved b) disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12) The oath or declaration is objected to by the Examiner.

#### Priority under 35 U.S.C. §§ 119 and 120

13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some \* c) None of:

1. Certified copies of the priority documents have been received.

2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_ .

3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) The translation of the foreign language provisional application has been received.

15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

#### Attachment(s)

1) Notice of References Cited (PTO-892)

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_ .

4) Interview Summary (PTO-413) Paper No(s) \_\_\_\_\_ .

5) Notice of Informal Patent Application (PTO-152)

6) Other: \_\_\_\_\_ .

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 6, are rejected under 35 U.S.C. 102(b) as being anticipated by Tuggle.

Regarding claim 1, Tuggle shows an internal wall section (14) and an external wall section (16) displaced a predetermined distance from and juxtaposed with the internal wall section (14). Tuggle shows an airflow passage (40) between the internal wall section (14) and the external wall section (16) and an air circulation system (10).

(Fig. 1)

Regarding claim 2, Tuggle shows the air provided is conditioned.

Regarding claim 5, Tuggle shows the air circulation system creates a positive air pressure in the structure.

Regarding claim 6, Tuggle shows the air circulation system is placed inside the structure.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tuggle in view of Winskye.

Tuggle shows the basic claimed structure. Tuggle does not show roofs coupled to the external wall section. Winskye shows roofs coupled to the external wall section. (Fig. 30c) It would have been obvious to use a roof coupled to the external wall section as in Winskye in the structure of Tuggle since roofs protect the enclosure of the walls from the environment.

Claims 7-13, are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuggle in view of Ojala.

Tuggle shows the basic claimed structure. Tuggle does not show a plurality of outer walls and a roof to form an enclosed structure, the external wall section including an insulating layer, a weather-resistant layer outside of the insulating layer, a sheath inside the insulating layer, the internal section including a liquid barrier, a wall framing system, a first sheathing between the liquid barrier and the wall framing system, and a second sheathing inside of the wall framing system.

A plurality of outer walls and a roof to form an enclosed structure are well known in the art. Ojala shows the external wall section (88) including an insulating layer (94) and a weather-resistant layer outside of the insulating layer (88). Ojala shows a sheath (70) inside the insulating layer (88). Ojala shows the internal section (60) including a liquid barrier (92), and a wall framing system (60), A first sheathing between the liquid

barrier and the wall framing system, and a second sheathing inside of the wall framing system are well known in the art. (Fig. 3, 4)

It would have been obvious to one of ordinary skill in the art at the time the present invention was made to use the wall system as in Ojala and known in the art in the structure of Tuggle. The wall system of Ojala and known in the art is typical domestic architecture and the wall through which the airflow passage goes in Tuggle is also typical domestic architecture.

Claims 14-25. are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuggle in view of Tedman et al.

Regarding claims 14-19, Tuggle shows the basic claimed structure. Tuggle does not show a moisture sensor in the airflow passage with a controller and a circuit to interface with the sensor, and a processor. Tedman et al. shows a moisture sensor in the airflow passage with a controller (Abstract). Interfacing circuits and a processor are well known in the art. It would have been obvious to one of ordinary skill in the art at the time the present invention was made to use the system of Tedman to control the humidity in the air flow passage in Tuggle. This would expedite the drying of clothes.

Regarding claims 20-25, the claimed methods are the obvious method for inhibiting moisture accumulation using the Tuggle's modified dryer vent connection.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moras shows a composite vapor barrier panel.

#### ***Claim Objections***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3 is allowed for the attic that is in air communication with the airflow passage.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve M Varner whose telephone number is 703 308-1894. The examiner can normally be reached on M-F 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl D Friedman can be reached on 703 308-0839. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305-7687 for regular communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-1113.
